“Improving Patient Safety”

Registration Form

The Academy and Medical Protection Society (MPS) jointly invite you to this seminar.

Hospitals are places which concentrate high risk clients for high risk interventions. Surveys across the world identified adverse outcomes related to clinical management in the order of 1 - 2% of all hospitalization. Patient safety is the first priority of doctors and health care institutions. Identification of root cause, system management and open sharing of knowledge have advantages over the old name, blame and shame management. Hong Kong has gone a long way for patient safety in both public and private sectors. Experts in relevant fields will share their experience and views with participants in this seminar.

The seminar is free of charge for Fellows and trainees but registration is required.

**Date and Time**
