

International Diagnostic Course Davos Excellence in Teaching

The 2nd IDKD Hong Kong:

We are pleased to announce the 2nd IDKD to be held in Hong Kong on June 16th-19th 2012 on Diseases of the Abdomen and Pelvis, to be taught by yet another world renowned international faculty who are leading experts in the field. After a successful 1st IDKD in Hong Kong with more than 260 participants from 30 nations, we have obtained resounding support from the organization to hold the 2nd IDKD in Hong Kong. Please find the preliminary announcement in the attached for your perusal and dissemination to your staff and colleagues. There will be 14 workshops and several highlight lectures on imaging of important diseases in the abdomen and pelvis. Tentatively, half day on the 19th is optional and tailored more for overseas participants. We are planning to provide a fast-track, intensive option for local participants so that they need not take time-off on the 19th.

We hope that you will continue to support the IDKD in Hong Kong, and look forward to seeing you at the course.

Sincerely,

Pek-Lan Khong
Member of Local Board, IDKD
Professor and Head
Department of Diagnostic Radiology
The University of Hong Kong
