

Update on Diabetes Management

(A Certificate Course for Clinicians)

31 August – 01 September 2013

**Li Ka Shing Faculty of Medicine
The University of Hong Kong**

Co-organized by:

KK Leung Diabetes Centre, Queen Mary Hospital
and
Research Centre of Heart, Brain, Hormone and
Healthy Aging, The University of Hong Kong

WELCOME MESSAGE FROM THE DIRECTOR

Prof. Karen Lam

Diabetes is now one of the most common non-communicable diseases globally, with a total of 366 million cases expected by 2030. In Hong Kong, one in ten adults suffers from diabetes. Over the past decade, the advent of new diagnostic criteria, the development of novel anti-diabetic agents and the advances in monitoring systems and treatment devices have led to considerable changes in our approach to diabetes management. This course aims to equip practicing clinicians with the most updated information and knowledge on the provision of comprehensive diabetes care. Specialists will be invited to share their expertise on various aspects of diabetes management with our participants so that they, in turn, can help their patients to achieve optimal metabolic control and reduce the risk of long-term complications. We cordially invite you to join in this enjoyable weekend course.

Course Outline

- Update on management guidelines
- Conventional and novel anti-diabetic drugs
- Insulin therapy: Practical issues
- Multi-disciplinary management of diabetic complications
- Interventional therapy for obesity in diabetes
- Cardiovascular diseases, cognitive dysfunction and diabetes

Entry Requirement

Open to all local/ overseas general practitioners or specialists and healthcare providers with active involvement in diabetes management.

Time and Venue

31 August 2013 (Sat) 12:45pm to 6:00pm
