gap between complex health
system and leadership, meeting
challenges with new insights**

About JC School of Public Health and Primary Care

The Jockey Club School of Public Health and Primary Care (JCSPHPC) is the first and the only comprehensive school built and dedicated to public health in Hong Kong. The focus of our work is postgraduate education, training and research. We are pleased to offer courses and degrees across all area of public health practice. We offer all students grounding in professionally recognised competencies and in areas increasingly recognised as core to public health. We also collaborate with colleagues in other Faculties of University. Our aim is to provide opportunities for all those interested in learning more about public health.

The Chinese University of Hong Kong

Prepare you to become a Health Leader

The environment of health systems is complex and dynamic. It involves a system of different sectors with many stakeholders, requiring collaboration amongst professionals of diverse background in policy, practice and academia, partnership with the private sector, non-governmental organisations and foundations, engagement of local network and global communities.

Local systems are also interlinked with regional and global ones. Leading effectively within this complex system requires a skill set beyond managing individual organisations.

The Health System Leadership Programmes brings the participants an international faculty to equip them to meet these challenges ad to in the forefront of health system leaders.

The Faculty

The Faculty is made up of experienced health system leaders who had worked across international, national, regional and organisational arenas. Their join experiences will enable the development of profound insights into the theories and practices of leadership in the complex environment of health systems.

A Dynamic Health System & Leadership Framework

Programme developed based on a dynamic leadership framework which brings out leadership interaction with key components of the health system.
